

Procedure for Using nRF Toolbox to OTA Update of Tigr TRIO Sensor Firmware:

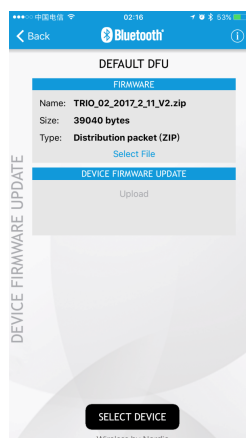

- 1) Tools required:
 1. An iPhone/iPad with Bluetooth turned on.
 2. A TRIO sensor with OTA DFU function.
 - a) **IMPORTANT:** Ensure that there is sufficient battery charge in the TRIO. Any power disruption during the update may result in permanent failure of the unit.
- 2) Download the nRF Toolbox app from the App Store to your iPhone/iPad.
- 3) Copy the latest TRIO firmware in the form of a zip file into the phone.
 1. In the case of iOS via iPhone/iPad, follow these steps:
 - a) In the email message containing the TRIO firmware zip file, tap the zip file and the following screen will appear:

- b) Tap the Airdrop logo on the bottom left of the screen.
 - c) Slide the list of icons in the Airdrop menu until you see the nRF Toolbox icon, then tap the icon.

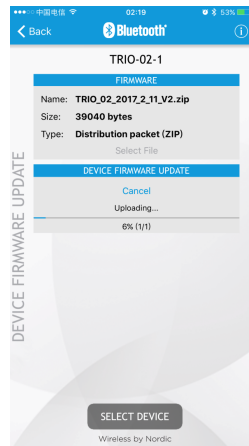

- d) The following screen will appear:

4) Use nRF Toolbox to update firmware on TRIO following these steps:

1. You should make sure the TRIO sensor is turned on and Bluetooth is turned on in your phone. Then tap Select Device.
2. Choose the TRIO sensor and then tap Upload.

3. When the file is being uploaded to the TRIO, the green indicator light on TRIO will turn on in steady state. After the upload is complete, the following screen will appear.
